

REMARKS

Claims 32-51 have been allowed in this application. By this Amendment, the specification and claim 36 are amended to change the concentration of 5-bromo-4-chloro-3-indolyl-N-acetyl- β -D-glucosaminide to $20-600 \times 10^{-6}$ M. Support for these amendments appears at originally-filed claim 10 and at page 5, line 2, of the original application.

In the July 20, 2004 Amendment, the original concentration of 5-bromo-4-chloro-3-indolyl-N-acetyl- β -D-glucosaminide of $20-600 \times 10^{-6}$ M was changed to 20-600 mM. However, this change was an error. The correct concentration is $20-600 \times 10^{-6}$ M as evidenced by Example 1 of the specification, wherein the concentration of 5-bromo-4-chloro-3-indolyl-N-acetyl- β -D-glucosaminide is 0.1 g/l. Correction of this error does not affect the patentability of the claims and does not require a new search. The correction was not made sooner because it was only recently realized that this amendment was in error.

Should the Examiner have any questions regarding this Amendment, he is invited to contact the undersigned at the telephone number set forth below.

Respectfully submitted,
